

Supporting Question 1:	What did the “Poison Squad” experiments reveal?
Source 1B	“Song of the Pizen (Poison) Squad” written by S. W. Gillilan, a member of Wiley’s experimental team. A genuine recording of this song has been lost to time, but using contextual clues, <i>Learning by Hearings</i> was able to recreate the tune as closely as possible using AI. Lyrics: Gillilan, S. W. (1903). Song of the Pizen (Poison) Squad. Music: Suno AI. (2024). <i>Suno</i> (May 6 version) [Large language model]. https://suno.com/	

O we're the merriest herd of hulks
that ever the world has seen;

We don't shy off from your Rough-On-
Rats or even from Paris green:

We're on the hunt for a toxic dope
that's certain to kill, sans fail.

But 'tis a tricky, elusive thing and
knows we are on its trail;

For all the things that could kill we've
downed in many a gruesome wad,

And still we're gaining a pound a day,
for we are the Poison Squad.

On Prussic acid we break our fast; we
lunch on a morphine stew;
We dine with a matchhead
consommé, drink carbolic acid brew;

Corrosive sublimate tones us up like
laudanum ketchup rare,

While tyro-toxicon condiments are
wholesome as mountain air.

Thus all the "deadlies" we double-dare
to put us beneath the sod;

We're death-immunes and we're
proud as proud--

Hooray for the Poison Squad!
